The largest range of electroless nickel plating in Europe

WHAT SETS US APART

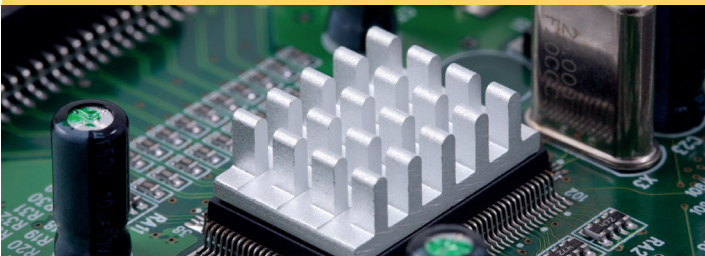

ENGINEERING SOLUTIONS

Entrust your project to our team, compiled out of experienced engineers and technicians. They will make your design compatible with plating.

LAYER FOR BRAZING

Did you know that electroless nickel is a reliable bonding layer for soldering? Kanigen Group developed a special process for this application, automotive qualified.

ELECTROLESS NICKEL ON ALUMINUM

A festival of benefits not to be missed. Aside from our automated line, we plate parts with large dimensions till 2600 x 2050 x 1000 mm.

QUALIFIED AUTOMOTIVE PROCESSES

Our automatic production lines are qualified for the automotive sector. Over the years, We have built up specific know-how for this demanding market.
